

X-REX

X POSTS FOR RESTAURANTS

Powered by X's open-source For You algorithm

YOUR VOICE → YOUR POSTS

Posts that sound like **you**. Written for you.

You run the line, the floor and the books. Posting on X keeps sliding to tomorrow. **X-Rex is your writing sidekick**. We write your posts in your restaurant's own voice, check every draft against the ranking weights X has published, and get your specials, events and late-night menu said.

How it works

01 / YOUR VOICE

Make it sound like you.

Send old posts, your menu and how you talk to regulars. We keep your words.

02 / THE SCORE

Check it against X's published weights.

X-Rex scores each draft and flags what that formula marks down.

03 / THE DRAFTS

Short. Natural. Worth reading.

About your food, your people and your block. No filler.

04 / YOUR CALL

You approve every post.

Nothing goes out without your OK. Edit or toss anything.

Two ways in

DO IT YOURSELF

X-Rex App

Self-serve. Use the X-Rex app directly. Drop in a special or an idea, get drafts in your voice, and score each one against X's published weights. You edit, you post, on your own schedule.

DONE FOR YOU

X-Rex Posts

Hands off. Every month we write and score your X posts, in your voice, with your sign-off on every one.

OPEN CODE. CLEAR ASSUMPTIONS.

A simulation, with receipts.

X-Rex scores are a simulation, not a guarantee. X's published weights power the arithmetic. Our visible assumptions supply the rest, because X's live feed uses data nobody outside X can see. A higher score means a post fits that formula better. It does not promise reach, followers, visits or sales. That holds for every score, in the app or done for you. What we can promise: real posts, in your voice, on a steady schedule, signed off by you.

Less guesswork. More understanding.
